Project: Project Portal Web App

Starting Date: **Ending Date:**

Project Demo Link: https://file-management-tools.thmanik1241.workers.dev/?bidId=project-bid-26001

KCTC(client) <> KET (PC) <>TMS (Vendor)

	Comment	Status
01	**26-07-21 / Habib** General Comments - Suggested name: ProjectFlow / check the uniqueness, domain availability - Header: App name with logo, User info (right Side), Projects with (xxx : the subscription buying company), at the center both company can be shown for example, - For TMS side: TMS <>KET - For KET side: KET - For KCTC side: KET<>KCTC(one of the client of KET)	Open
02	**26-07-16 / Habib** Page: Dashboard  Update the table content. Column titles: Document – Project / Bid – Shipment No. - Revision – Due Date – Status – Action. Status: - Received (not assigned), - Assigned - Ongoing (in which table), - Submitted Action buttons: - Assign, - Accept / Decline - Approve (pass to next reviewer), - Delivery	Open

Commented [NA1]: ask for Media Managers Suggestions?

Commented [NA2]: Based on individual users? That is based on who ever is using at the time of use?

Commented [NA3]: Marketing team received?

Commented [NA4]: Which table or which stage? Didn't understand the comment.

	- comment > comment text box + can add attachment, like excel sheet. > Comment for Info > comment to request revision. > - Approve button > pop up > Delivery X person. Comment button > pop up > send to X person. (default from whom the doc is received)	
03	**26-07-16 / Habib** Page :Create Bid/Project  - Add input / auto suggestion from pre-created input or show option as 'add new'. - Change > source channel to Reference - File Section feature: - Can add multiple file at once - After upload > can change the category - Shipment No. File section table to be like, File Name – Category – Shipment Number – Upload Date File category: - General - Cargo Info - Port Info > Port Name - Grillage Info - Loading Ballast Info - Unloading Ballast info - Contract Info	Open
04	**26-07-16 / Habib** Assign Feature - Anyone can request work to a team only. - Request to person can be done within a team.	Open
05	**26-07-21 / Habib** Company Level Access - Only the purchasing company (PC)/admin can control the access	Open

Commented [NA5]: as per our conversation with the engineering team the fields in the screenshots were told to vary per project. Below the box in the screenshot in the box for **Bid Info** where the requested feature/options are available.

If something else is referred, please mention.

Commented [NA6]: So, we will just change the **field name** to Reference?

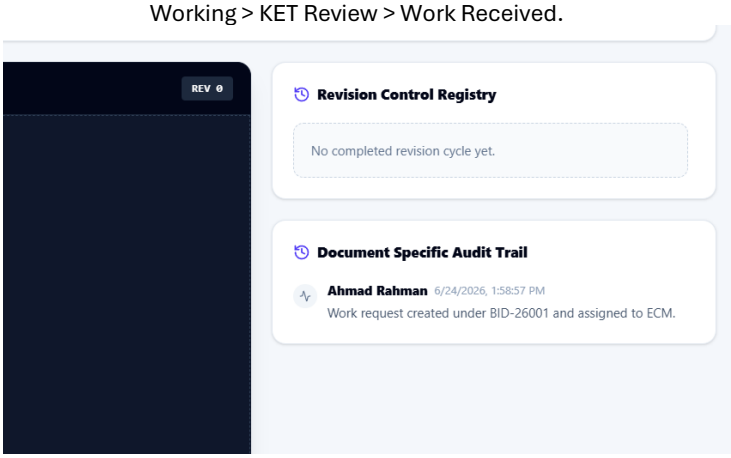

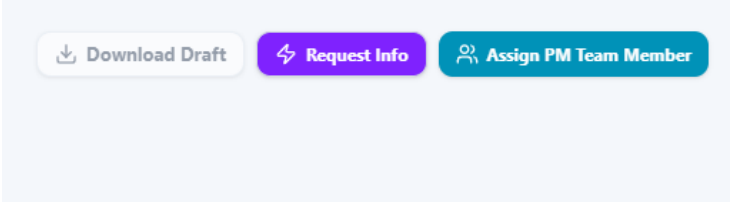

Commented [NA7]: This feature is present at the moment but while creating a new bid/project the names of the multiple files uploaded is not visible. **Manik** will brief on it.

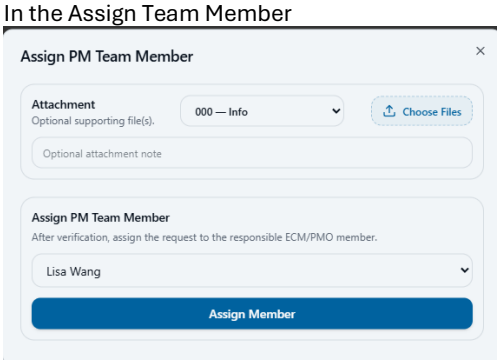

Commented [NA8]: also present with a drop down.

Commented [NA9]: Available under the **Bid Info** box.

Commented [NA10]: as the shipment number is part of the naming convention it was put under **Bid Info**. Do you want it transferred to the File section?
also, should we only keep these options in file sections then?

Commented [NA11]: Please clarify-
1. will it be a job that consists of one or multiple files and information?
2. will it be just files and information?

	- PC can only add a new vendor/subcontr actor/user - During the test phase, activating the access feature depends on the user chosen in the top dropdown.	
06	**26-07-21 / Habib** Work Flow  - Work flow visibility will depends on user access. For example, I don't want to show the TMS flow to KET's end client. - Flow can be as below, ○ For KET : KET Received > TMS Received > TMS M1 Review > TMS M2 Assigned > TMS M2 Working > TMS M2 Done > TMS M1 Review > Send to KET ○ For KET's client : Create Work request > KET Received > KET Working > KET Review > Work Received.  For each document page add below, In right bar, there should be time line , like due date , work receive date from KET (for TMS) - Add button to request extra time /extending due date - Show work progress in %  In action area add below action button,	Open

	- Send to (next receiver in cycle) In the Assign Team Member  The attachment should be available from original sender list by default. Each user can modify the attachment list.	
06	**26-07-21 / Habib** **Site Storage** - Check storage requirements and cost - Check security protocol	
07	**26-07-21 / Habib** **Subscription Management** - Portal to be prepared automatically with custom domain or need manual setup? - Each subscription cost, server end, maintenance cost, etc.	
08		

Commented [NA12]: Need to discuss during the meeting for clarification.

Doc name	Description	Category	Shipment NO.	Upload Date
KB-2000-c	Mumbai Port drawing	Port Info	N/A	

KCTC >>> 10 file upload >>> KET >> TMS >> 8 files >>> Humayun >>> 4 files
